

HOZELOCK

AQUAPOD™

The easy guide to
effortless watering

www.hozelock.com

WHY SHOULD YOU CHOOSE THE AQUAPOD WATERING SYSTEM?

WE HAVE 4 GREAT REASONS

The automatic drippers always deliver a constant flow of water to make sure your plants get the right amount

1 AQUAPOD WATERS YOUR PLANTS FOR YOU

Going on holiday or no time? AquaPod will automatically water your plants allowing you to relax and enjoy your garden

The timer turns the water on and off to water your plants when you are away

Actual size of AquaPod: 135mm x 170mm

EASY INSTALL
IN 5 MINUTES

2 AQUAPOD IS EFFORTLESS TO INSTALL

AquaPod has fewer components making installation simple and effortless compared to traditional drip watering kits

You can combine up to 9 Plus Pod Kits (2824) or Plus Kits (2825) from 1 tap

EXPANDABLE
IN 2 MINUTES

MAX 9

3 AQUAPOD IS FLEXIBLE AND EXPANDABLE

The flexibility of AquaPod allows for the system to be extended or moved to another part of your garden quickly and effortlessly

-90%
H₂O

4 AQUAPOD USES 90% LESS WATER

Compared to using a watering can, AquaPod will save you 90% of your garden watering

HOW DOES THE AQUAPOD WORK?

A WATER COMPUTER

Battery powered, attaches to the outside tap, turns the water on and off. Programmed to water your plants when you are away. The start point of the system can be positioned up to 50m from the tap

The water computer is only supplied with the AquaPod Auto10 but can be added to any AquaPod system

B MICRO PIPELINE

Ultra small hose pipe discretely takes water all around the patio

Micro pipeline should be no longer than 10m

JUST PULL & PLACE...

...THEN REWIND TO STORE

INSTALLATION IN 4 EASY STEPS

C AQUAPOD

Fully assembled unit with 5 x 1m hoses. Each hose has an automatic 4lph dripper fitted. Hoses can be pulled out, rewound and turned on/off independently

Hose can be extended up to 1 metre

1

Connect to the tap

2

Lay micro hose around your patio

3

Connect AquaPod to the hose

4

Place dripper in container

HOW DOES THE
AQUAPOD WORK?

Available AquaPod Kits
