Hozelock's new Killaspray pressure sprayer range includes the 1.25, 5, 7 and 10L models shown here, plus 12 and 16L knapsack sprayers

The Killaspray Plus 7L sprayer comes with a telescopic lance, fan spray and weedkiller cone

Hozelock's new Spraymist 0.5L trigger sprayer

Hozelock's 10L Killaspray can treat many borders without refilling

The new Hozelock Killaspray Plus 16L knapsack sprayer is ideal for applying chemical treatments in large gardens

FIGHT WEEDS, PESTS AND DISEASES WITH NEW HOZELOCK SPRAYERS

Mild, wet winters have led to an increase in garden pests and diseases and so a new range of pressure sprayers from Hozelock which offer a labour-saving and cost-effective way to protect and nurture plants looks to be well timed.

Ideal for applying water-soluble fertilisers and weedkillers, pesticides, fungicides and even for watering, the new **Killaspray** and deluxe **Killaspray Plus** sprayers offer a wide variety of options and sizes, ranging from 1.25L bottles to 16L knapsack sprayers.

For smaller spraying jobs, indoors or out, there are three new **Spraymist** models – 0.5 and 1.0L trigger sprayers and a 1.25L pressure sprayer – in lively pink. And at the other end of the spectrum, there are four new **Viton**[®] heavy-duty sprayers with special long-life chemical resistant seals.

Hozelock research has shown that buying chemical concentrate to use with a 7L pressure sprayer gives gardeners spraying power equivalent to 54 ready-to-use pre-filled trigger sprayers – resulting in huge savings. With climatic conditions as they are it is likely that repeat applications will be required to counter aphids, whitefly, vine weevils, mildew, blackspot, bracken, ground elder, horsetail, Japanese knotweed and many more weeds and diseases.

Thanks to a translucent graduated bottle and a wide filling neck, it is easy to mix up chemical solutions accurately inside the sprayer. After a few pressurising pumps of the heavy duty metal shaft with large, easy-grip handle, the sprayer is ready for action; and thereafter, a few pumps at infrequent intervals are all that's required to keep spraying.

To minimise fatigue on long spraying jobs, the on/off flow control trigger can be locked down for continuous spraying; and the supplied shoulder strap enables the canister to be carried easily around the garden whilst spraying. The larger 12 and 16L models come with a full backpack harness which spreads the load evenly for maximum comfort.

Killaspray

An unbreakable 30cm long fibreglass lance (with all sizes of the Killaspray from 5L upwards) makes it possible to reach the back of deep borders or high plants while directing the spray precisely where it is required – an angled nozzle making it easy to treat the underside of leaves. And by twisting the nozzle, the spray pattern can be instantly changed from a jet spray for spot treatment to cone and mist sprays for rapid chemical application over a wider area.

Killaspray Plus

Keen gardeners will like the extra performance and features of the Killaspray Plus 5, 7, 10, 12 and 16L models. These come with a telescopic lance which extends from 50 to 85cm, eliminating the need to bend over when spraying at ground level and also making them ideal for spraying fruit trees and other hard-to-reach plants.

A fan spray and a weedkiller cone hood to prevent spray drift are supplied as standard accessories with all five Killaspray Plus models which also benefit from an integral foot rest to provide extra stability when filling or pressurising the sprayer canister.

Viton

For spraying more aggressive chemicals such as water-based timber preservative, Hozelock have also introduced a new range of Viton® heavy duty sprayers in 1.25, 5, 7 and 10L sizes with industrial grade seals and 'O' rings made from DuPont Viton® fluoroelastomer which is highly resistant to aggressive chemical solutions which would quickly corrode conventional rubber seals.

Backed by long guarantees – five years in the case of the Killaspray Plus models – the new Hozelock sprayers are widely available from good garden centres, High Street stores and DIY multiples.

For more information see the new Hozelock website at www.hozelock.com or call the firm's helpline on 0870 850 1959.
